

# VAPIR PEN

## INSTRUCTIONS

### On/Off:

- Click 5 times to turn on or off (blinking).
- Click 4 times to change the temperature setting:  
Green = Low | Blue = Med | Red = High

### To Operate:

Hold the button down and inhale. Unit automatically shuts off after 15 seconds.

### To Charge:

Connect USB cable to any USB power supply. When the unit is fully charged the LED blinks in Green and turns off.

### Tips:

- The battery will charge in approximately two hours.
- Hold pen vertically to ensure contents heat efficiently.
- When the battery is low, vapor may be reduced. A full battery will provide the best result.
- The quartz dual-rod atomizer gets hotter vs the ceramic atomizer and is used for quick hits. it is recommended to run this atomizer at Low / Med temperature settings.
- The ceramic donut atomizer has lower temperature which results in efficient and flavorful vapes. it is recommended to run this atomizer at Med/ High temperature settings.
